Autobiography as a short story

Prof. Dr. Abdullah OLGUN was born in 1968 in Turhal, Tokat, Turkey. He completed primary and secondary education in Turhal. After secondary school he began to study in Işıklar Military High School in Bursa in 1982 and graduated in 1986 getting the highest grade. The same year, he began to study in Gulhane Military Medical Academy (GATA) Military Medical School and graduated in 1992 with the rank of lieutenant MD. Following trainees in Ankara and Samsun in 1993, he was appointed as the chief physician of Infirmary with 30 Beds in Çubuk Ankara. After this position, he began to residency in the Department of Biochemistry and Clinical Biochemistry of GATA in 1995. He completed his residency with thesis in 1998 and became physician specialist (PhD equivalent). The same year he was appointed as a specialist to Sarıkamış 200 Bed Military Hospital. During this period, he was awarded with one year research grant in Baylor College of Medicine "Huffington Center on Aging" in Houston United States between 1999-2000. Here, he did research on the molecular mechanisms of aging using cellular senescence and *C. elegans* as models. Following this, he became assistant professor in the Department of Biochemistry and Clinical Biochemistry of GATA in 2000. While in this position, he began "part-time" to "Bioinformatics" master's degree program with thesis in Ankara University Biotechnology Institute in 2004. After six years as assistant professor, he was appointed as the chief of the biochemistry laboratory of the Turkish Armed Forces GATA Rehabilitation and Care Center in 2006. He completed master's degree program in 2007. The same year he became associate professor of biochemistry. And he began "part-time" to Pharmaceutical Botany doctoral training in Ankara University Graduate School of Health Sciences in 2008 in order to benefit from medicinal plants in his aging studies. Because of the expiration of his duty in Ankara, he was appointed as the chief of the laboratory section of Erzincan Military Hospital in the same year. In addition to this duty he has conducted research and taught postgraduate students here and in Erzincan University between 2008-2011, and founded and headed "part-time" the laboratory of Erzincan Private Neon Hospital in 2010-2011. In addition to his duty as the chief of laboratory department he was appointed as Vice Chief Physician between August 2010- September 2011. He moved to Antalya in September 2011. He became the head of the laboratory of Private Side Anatolian Hospital in Manavgat Antalya in 2011. In year 2012, he founded Biogerontology Laboratory in Technopolis of Akdeniz University in Antalya

where he continued his studies on aging. In year 2015, he was appointed as professor of biochemistry in İstanbul Kemerburgaz (now Altınbaş) University, Faculty of Pharmacy, Department of Biochemistry. In 2016, he was appointed as vice dean. In 2017, he was appointed as founder dean of İstinye University Faculty of Pharmacy. He is married and father of 3 children. He is fluent in English and French.
